Summary of Message to Congress and Account Descriptions

The Church views international assistance as an essential tool to promote human life and dignity, advance solidarity with developing nations, and enhance human security. The USCCB and CRS prioritize the accounts below because they are most focused on saving lives and reducing poverty. This assistance is just over one-half percent of the federal budget, not the 20-25% many Americans believe it constitutes. We urge Congress to **maintain funding for international poverty-reducing development and humanitarian programs to meet urgent needs and invest in peace.**

Maternal and Child Health programs provide low-cost life-saving interventions, such as micronutrient supplementation, nutritional support, newborn care, immunization, and treatment of pneumonia and diarrheal disease – addressing the biggest killers of mothers and children in the developing world.

Nutrition programs provide interventions such as micronutrient supplementation and growth monitoring, which combined with an adequate diet and clean water and sanitation, improves outcomes during the first critical years of a child's life.

Vulnerable Children programs address the special needs of displaced children and orphans.

HIV and AIDS PEPFAR (USAID & State Funding) funding focuses on prevention, care and treatment, and the support of children affected and infected by HIV and AIDS. Although we have principled concerns about those PEPFAR prevention activities we find inconsistent with Catholic teaching and do not implement or advocate for these activities, we support PEPFAR's overall lifesaving mission and urge robust funding for the Global Fund.

ⁱ **Malaria** programs treat, prevent, and control this deadly disease with the vision of ending preventable child and maternal deaths. The programs also build government capacity to treat and prevent malaria. The Administration's FY18 Request reprograms \$250 million from Ebola emergency appropriations in FY15.

Tuberculosis programs screen, diagnose, and treat millions of people each year affected by the leading infectious disease killer globally in order to cure and prevent the spread of TB.

Neglected Tropical Diseases programs focus on scaling up integrated treatment to prevent parasitic and bacterial diseases that cause morbidity and mortality.

ⁱⁱ **Pandemic Influenza and Other Emerging Threats** programs prevent, prepare for, and respond to unanticipated and emerging global health threats. The Administration's FY18 Request reprograms \$72.5 million from Ebola emergency appropriations in FY15 and renames the account.

ⁱⁱⁱ **Development Assistance** programs support an array of critical development activities, including primary education; food security; clean water and sanitation; microfinance, climate change adaptation and mitigation; democracy promotion and good governance, and conflict management and mitigation. The Administration's FY18 Request combines the DA and ESF accounts into a new Economic Support and Development Fund account, and reduces overall funding compared to preexisting funding levels for DA and ESF.

International Disaster Assistance funds emergency health, water, shelter and nutrition efforts, as well as disaster risk reduction and rehabilitation through the Office of Foreign Disaster Assistance (OFDA). It also supports emergency food security through the Emergency Food Security Program (EFSP).

Migration and Refugee Assistance protects refugees and internally displaced persons, helps them to repatriate when conflict ends or natural disaster responses permit, and to resettle to safe countries like the U.S. This level would fund resettlement of 75,000 refugees in the U.S.

Emergency Refugee and Migration Assistance is a drawdown account used, with Presidential authority, to respond to humanitarian crises.

Complex Crisis Fund enables rapid investments to catalyze peace and mitigate conflict in the face of unforeseen crises or violence.

Millennium Challenge Account provides U.S. funding to countries with a commitment to good governance, focusing on infrastructure projects.

Atrocities Prevention Board (APB) improves collaboration, analysis and information sharing to mobilize U.S. efforts to prevent future atrocities and crises.

Contributions to International Peacekeeping Activities deploy peacekeeping troops to protect civilians in places like Sudan and Somalia.

Peacekeeping Operations finances the training and equipping of peacekeeping troops before they deploy to conflict countries and the professionalization of militia groups into formal military forces committed to protecting their people.

Green Climate Fund provides assistance to developing countries to adapt to, and mitigate, impacts of climate change.

Combatting Trafficking in Persons US assistance helps other nations to prevent trafficking, prosecute perpetrators, and provide assistance to victims.

^{iv} **Food for Peace (Title II)** provides U.S. food aid for emergencies and funds long-term development programs that support nutrition and build resilience. The Administration's FY18 Request eliminates all funding for Food for Peace and shifts programming to IDA and Economic Support and Development Fund.

McGovern-Dole provides school lunches and take-home food rations to encourage students, especially girls, to attend school, and other school support efforts. The Administrations FY18 Request eliminates all funding for the program.

Local and Regional Purchase will provide local and regionally procured commodities for sustainability in the McGovern-Dole program.

International Labor Bureau funds programs to combat the worst forms of child labor, forced labor, and trafficking in persons.
